ANTI-VIRAL MINERAL PAINT *I-O Hybrid Technology*

The paint is enhanced with nano-sized natural mineral materials and thus creating nanopores that allow the wall breathing effect. Experiments proves humiditfication-regulating capabilities, making it suitable for Taiwan's warm and humid environment. During the rainy season, the coating effectively reduces moisture accumulation on the walls, ensuring a dry and refreshing indoor space, and most importantly preventing mold development.

淨彩礦物塗料 調濕型塗料

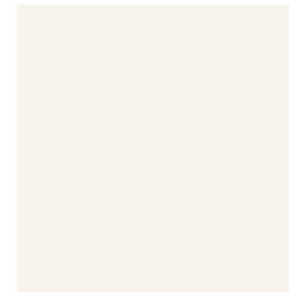

淨彩礦物塗料添加奈米級天然礦石原料，
奈米孔隙使牆面產生通透呼吸效果，經實驗證明有調濕功能，適合溫暖潮濕的台灣環境，
雨季時可有效降低牆面反潮現象，室內空間維持乾燥清爽就不用擔心發霉的問題。

透過病毒附著在奈米孔隙中，
其成分可抑制病毒活性，達到病毒和細菌
立即快速死亡的效果。牆面如同家中的免
疫守護者，為大家的健康而戰，面對上班
工作、戶外活動或是小孩每天上學可能帶
回家的病毒細菌，抗病毒塗料充分保護您
家中的室內環境，是重視居家健康的您最
好的選擇！

*Through trapping the viruses in the
nano-sized pores of the coating,
inhibition of viral activity and
rapid elimination of virus and
bacteria is achieved. The anti-viral
coating throughout the entire wall
space act as household immune
system guardians. Whether the
threat is from viruses, bacteria from
work, outdoor activities or children
returning from school, the anti-viral
paint provides
comprehensive
safeguard to your indoor environ-
ment. It is the perfect fit for your
healthy home.*

ANTI-VIRAL MINERAL PAINT

依照下列步驟這樣做 會得到更好的質感及效果

01 牆面前處理

新水泥牆面 |
在經過3~4週的養生後或尚未上漆的牆面，待表面完全乾燥後再上塗塗料。

舊水泥牆面 |
用鋼刷來清潔表面的灰塵或刮刀刮除鬆散的舊漆膜或舊水泥，並去除油脂，建議以批土整平後再上塗塗料。

02 美化整平

批土整平 |
以批刀或鏟子，將批土塗抹在牆面上。從底部開始，以垂直或水平的方式均勻批平。根據需求往上堆疊補平，以達到所需的平整度為準。

打磨 |
批土完全乾燥後，使用砂紙磨光牆面，以去除任何凸起或不平的地方，使其更加平滑。

遮蔽膠帶 |
能夠防止壁面邊緣沾染漆料，能有效地呈現整齊、美觀的上塗效果。

03 施作底漆

以未稀釋之淨彩礦物塗料施作第一道作為底漆，使用前須徹底攪拌均勻，可用羊毛/尼龍短毛滾輪或噴塗方式（無氣噴塗機）上漆。

小叮嚀
適用各項建築之水泥壁、水泥製品、矽酸鈣板、磚造物及石膏防火板等內部構造之防護，裝飾用面漆。

04 施作面漆

底漆施工完成至少6~8小時後，以未稀釋之淨彩礦物塗料再上塗1~2道。完工後的漆膜表面若有輕微髒污，可使用科技海綿沾水稍微擦拭。

Color Aesthetics in Your Space

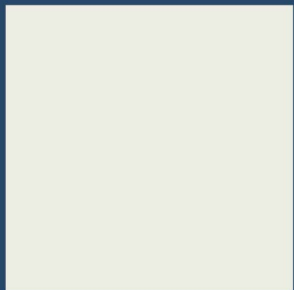

Enhance the aesthetics of your surroundings with our expert curated color schemes. Creating a harmonious and visually stunning environment.

Immerse yourself in a world of endless possibilities as our colors stimulate creativity and create mindfulness. The calming neutrals offer a range of options that suit your unique style and taste.

Experience the Transformative Effects of Our Color Aesthetics

Elevate your space to a new heights. Step into a realm where every color tells a story and every shade brings life to your surroundings.

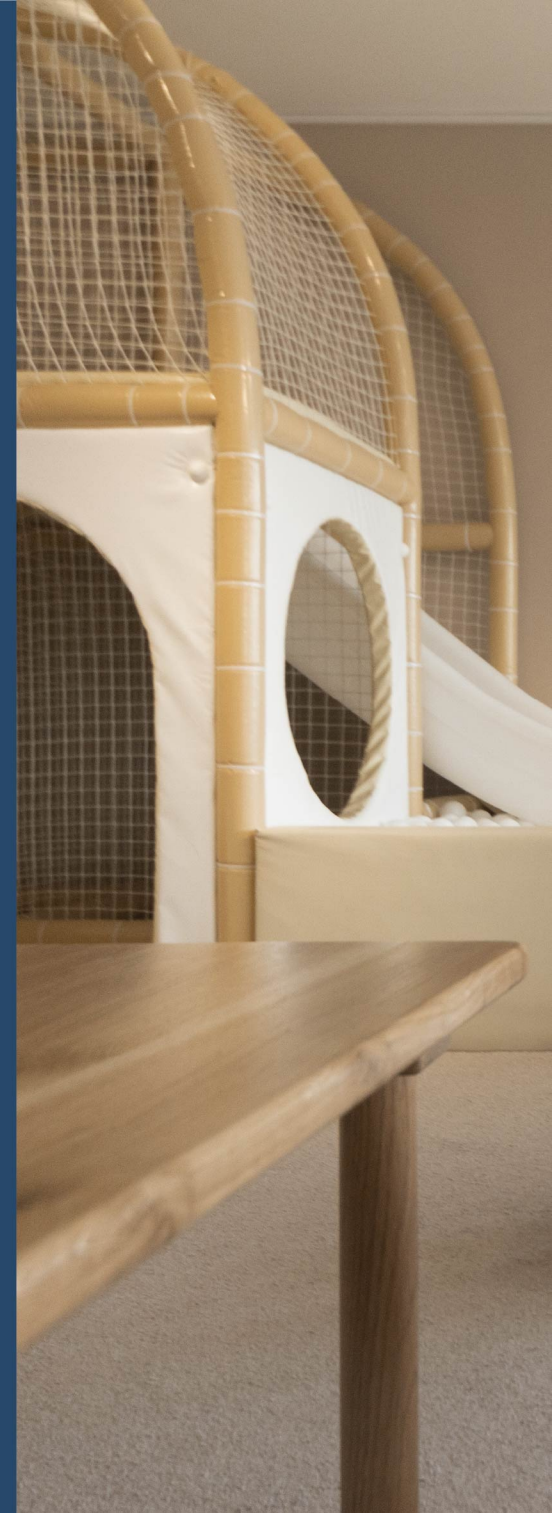

Choose your color and let the space speak your volume!"

I-O Hybrid技術 天然抗病毒配方

不採用金屬離子或季銨化合物類殺菌，透過漆膜富含的鹼性微孔結構捕捉病毒，破壞病毒蛋白結構或遺傳物質結構使得病毒失去活性。

1. 依據ISO 21702抗病毒測試對新冠病毒(COVID-19)SARS-CoV-2、流感病毒H3N2及貓卡利西病毒等有抗病毒效果。
2. 依據T/GDTL 011-2020及T/CNCIA 03002-2020標準對腸病毒71型、人類冠狀病毒229E具有抗病毒及抗病毒耐久性能。
3. 通過日本JIS Z 2801抗菌及JIS Z 2911防黴測試。

天然礦石原料 使牆面森呼吸

使用奈米級天然礦物原料，自然的孔隙呼吸讓牆面保持透氣不易反潮，調節濕氣使家更健康清新。

趨近於零VOC 無重金屬

無添加甲醛、銅、銀等重金屬，無塑化劑，經檢測VOC遠低於國家標準，提供健康的居家環境，呵護孩子健康成長。

透過富含鹼性的孔隙環境，當病毒附著其中即失去活性

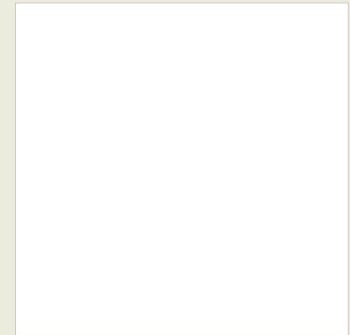

經實驗證實可對抗新冠病毒(COVID-19)SARS-CoV-2、
流感病毒H3N2及貓卡利西病毒、腸病毒71型、人類冠狀病毒229E
